Work Authorisation: Eligible for UK Graduate Visa (2-year work authorisation)

Professional Summary

Software Engineer with 3+ years of experience designing and building scalable web applications, primarily in JavaScript/TypeScript and Node.js. Proven track record delivering RESTful APIs, SSO integrations, payment platforms, and real-time notification systems across multiple client projects. Comfortable working across the full stack with React and Angular on the frontend. Currently pursuing an MSc in Data Science while contributing as a freelance backend developer.

Technical Skills

Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS
Backend: Node.js, Express.js, Fastify, NestJS, Laravel **Frontend:** React, Angular
Databases & Caching: PostgreSQL, MySQL, MongoDB, MSSQL, Redis
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD (GitHub Actions), Git
APIs & Architecture: RESTful APIs, GraphQL, Microservices, JWT, OAuth 2.0
Testing: Jest **Tools & Integrations:** Stripe API, OneSignal, Swagger/OpenAPI, TypeORM

Experience

- Software Engineer (Freelance)** – Keturu (Pvt) Ltd, Sri Lanka (Remote) Mar 2022 – Present
- Sole-developed the full backend for a property and vehicle marketplace (Deal Partner) using Fastify and MySQL, delivering admin dashboard and public-facing APIs from scratch to support the platform’s end-to-end operations.
 - Designed and implemented a multi-channel notification system in NestJS/TypeScript, integrating OneSignal for real-time push delivery across web, iOS, and Android within a multi-tenant architecture.
 - Built RESTful APIs for staff, labour, client, and purchase order modules on a construction management platform using Fastify, Prisma ORM, and MySQL, with comprehensive Swagger documentation.
- Developer** – Boss Boleh Sdn. Bhd., Malaysia (Remote) Jan 2024 – Dec 2024
- Migrated a legacy PHP-based database synchronisation system to Laravel, reducing data sync time by 45% across two production databases managing critical corporate data including companies, directors, shareholders, and secretaries.
 - Contributed to building an e-invoicing SaaS platform from inception, taking ownership of subscription management, end-to-end Stripe Connect payment integration, and webhook handlers for real-time event processing and subscription lifecycle management.
- Junior Developer** – YYC taxPOD, Malaysia (Remote) May 2023 – Dec 2023
- Built an internal knowledge-sharing platform in Laravel with Markdown support, enabling developers to document code snippets, bug fixes, and learnings — reducing repeated problem-solving across the team.
 - Sole-developed a centralised Single Sign-On (SSO) system in Laravel with role-based access control, integrating it with 4 internal applications serving 25+ developers — eliminating redundant credential management and strengthening security.
- Trainee Software Engineer** – Scintier Technologies (Pte) Ltd, Sri Lanka (Hybrid) Aug 2021 – Mar 2022
- Developed interactive, responsive modules for a Loan Origination System using Angular, improving the user journey and reducing friction in the application completion flow.
 - Engineered backend logic in .NET for secure form submissions, input validation, and file uploads, collaborating across the full stack (Angular, .NET, SQL Server) within a financial services product.

Projects

- Stripe Subscription & Billing Platform** *(Personal Project)* source code
- Built a domain-driven SaaS billing platform in Laravel using the Action-Domain-Responder pattern, with subscription lifecycle management, Stripe checkout integration, and async webhook processing via queued jobs.
 - Implemented feature gating with usage tracking and plan-based access control, plus RESTful APIs with Sanctum authentication and comprehensive Swagger documentation.
- Movie Ticket Booking System** *(Personal Project)* source code
- Designed and developing a microservices-based movie ticket booking platform using NestJS, TypeScript, and SQL Server, with 3 independent services (Identity, Theatre, Movie) following domain-driven design principles.
 - Implemented JWT authentication with RBAC supporting 4 user roles, layered security validation, RESTful APIs with Swagger documentation, and shared libraries for cross-service code reusability.

Education

- MSc Data Science** – University of Hertfordshire, UK Jan 2025 – Present
- BSc (Hons) Software Engineering** – University of Kelaniya, Sri Lanka Feb 2019 – Jul 2023
- GPA: 3.5/4.0
